

Scapa 6157

PVC Tape

DESCRIPTION

Nominal thickness 0.20mm+0.025mm Available in Transparent Lead free

APPLICATIONS

- Industrial applications
- Low temperature self adhesive tape

PRODUCT BENEFITS

- Tough, flexible and conformable

TECHNICAL PROPERTIES

Technical Property	Nominal Value	Unit	Test Method
Dielectric Strength	> 40	kV/mm	CEI EN 60454
Adhesion on Backing	> 150	g/cm	CEI EN 60454
Adhesion to Steel	> 150	g/cm	CEI EN 60454
Elongation at Break	> 200	%	CEI EN 60454
Tensile Strength	> 4	Kg/cm	CEI EN 60454
Thickness	0.20+0.025	mm	CEI EN 60454

STANDARD PRESENTATIONS

RECOMMENDATIONS

Material should be stored upright, in its original packaging away from moisture and direct sunlight within a recommended temperature range of 5 to 25°C. Although the functional performance of the material will remain unchanged for a prolonged period, application characteristics and appearance may change. We recommend therefore, that the product is used within 24 months of receipt.
